## 🦴 A truly unique shipment – from the Netherlands to Abu Dhabi

Our team at **Transport Support in Austria** recently had the pleasure of arranging a very special transport for our Austrian customer: **original dinosaur bones – estimated to be around 60 million years old** – from the Netherlands to Abu Dhabi Airport for the new Natural History Museum.

For this project, we closely cooperated with our trusted **network partner in the Netherlands, Andromeda Forwarding**, who provided excellent support in container arrangement, storage and local handling.

And as it is with such projects, the unforeseen needs to happen. By mistake of shipper's broker customs clearance took longer than expected and vessel was missed by this. So we had to change quickly from seafreight to airfreight service. The retrieval from port including customs issues was hard work, and again **Andromeda Forwarding** proved to be the right partner on our side. Special thanks to Michael Verkade who had lot of patience with us.

Once again, this shows how valuable our global network is – enabling us to manage even the most extraordinary shipments with precision, care, and full reliability.

Projects like this remind us why we love what we do: Connecting expertise across borders and turning logistical challenges into success stories.
